1. Introduction

1.1 Purpose of this Document

This Design Specifications document lays out the full visual, interaction, and interface design of the Uni Textbook Marketplace platform. It's meant to be the go-to reference for all our design decisions, covering brand identity, colour system, typography, our component library, screen layouts, navigation, accessibility standards, and responsive design rules.

1.2 Scope

This document covers the following parts of the Uni Textbook Marketplace:

- Landing page (unauthenticated)
- Registration flow (4-step multi-step form)
- Login page
- Authenticated homepage / listings browse
- My Listings page (with Smart Filters)
- Listing detail page
- Create Listing form
- Admin Review Dashboard
- Global navigation bar (unauthenticated and authenticated states)
- Wishlist
- Audit Log page
- Messaging page
- Report and Ban management (report a listing, admin report review, banned-account state, admin case/appeal review)

1.3 Design Philosophy

Our visual identity comes from the Agile Bridge brand guidelines, based on what we could see on the live Agile Bridge website (www2.agilebridge.co.za). We stuck to five core principles while designing:

1. **Bold and confident headings.** Large, heavy Montserrat type with cyan accents gives the page some energy and pulls the user's eye to the right place.
2. **Cyan as the signature colour.** #00B4D8 shows up on every interactive element. It's honestly the single most recognisable part of the brand.

3. **Clean white layouts.** Lots of white space, no cluttered backgrounds, content gets room to breathe.
4. **Rounded but professional.** Buttons get a slight 4px border radius, not sharp corners but not fully pill-shaped either.
5. **Montserrat throughout.** Using one typeface everywhere keeps things looking consistent across all the different text sizes and weights.

2. Brand Style Guide

2.1 Details

Note on Brand Style Guide

Our Brand Style Guide PDF is kept and version-controlled in our GitHub repository at `/docs/Demo 2/Design Specifications`.

It's also built right into the web app itself, you can get to it from the footer on the landing page. :)

3. Navigation

3.1 Global Navigation Bar

The nav bar stays fixed at the top of every page, and it looks different depending on whether you're logged in or not.

3.1.1 Unauthenticated State

Element	Specification
Background	#FFFFFF white
Min height	70px
Logo position	Left-aligned
Logo text	“UNI TEXTBOOK” (cyan, small caps) + “Marketplace” (dark navy, bold)
Right side	“Register” (secondary outline button) + “Login” (primary filled cyan button)
Bottom border	1px solid #dddddd

3.1.2 Authenticated State

Element	Specification
Background	#FFFFFF white
Logo position	Left-aligned
Centre links	Browse, Sell, Messages, Favourites
Link colour	#3a3a3a default, #00B4D8 on hover
Right side	Notification bell icon + Avatar circle (cyan, initials) + Username + Chevron dropdown
Avatar background	#00B4D8 with #ffffff initials
Initials source	First letter of first name + first letter of surname from database

3.1.3 Mobile Navigation

On screens narrower than 921px, the centre nav links collapse into a hamburger menu, right-aligned. Tapping it opens a full-width dropdown with all the nav links stacked vertically.

4. Page Designs

4.1 Authentication Pages

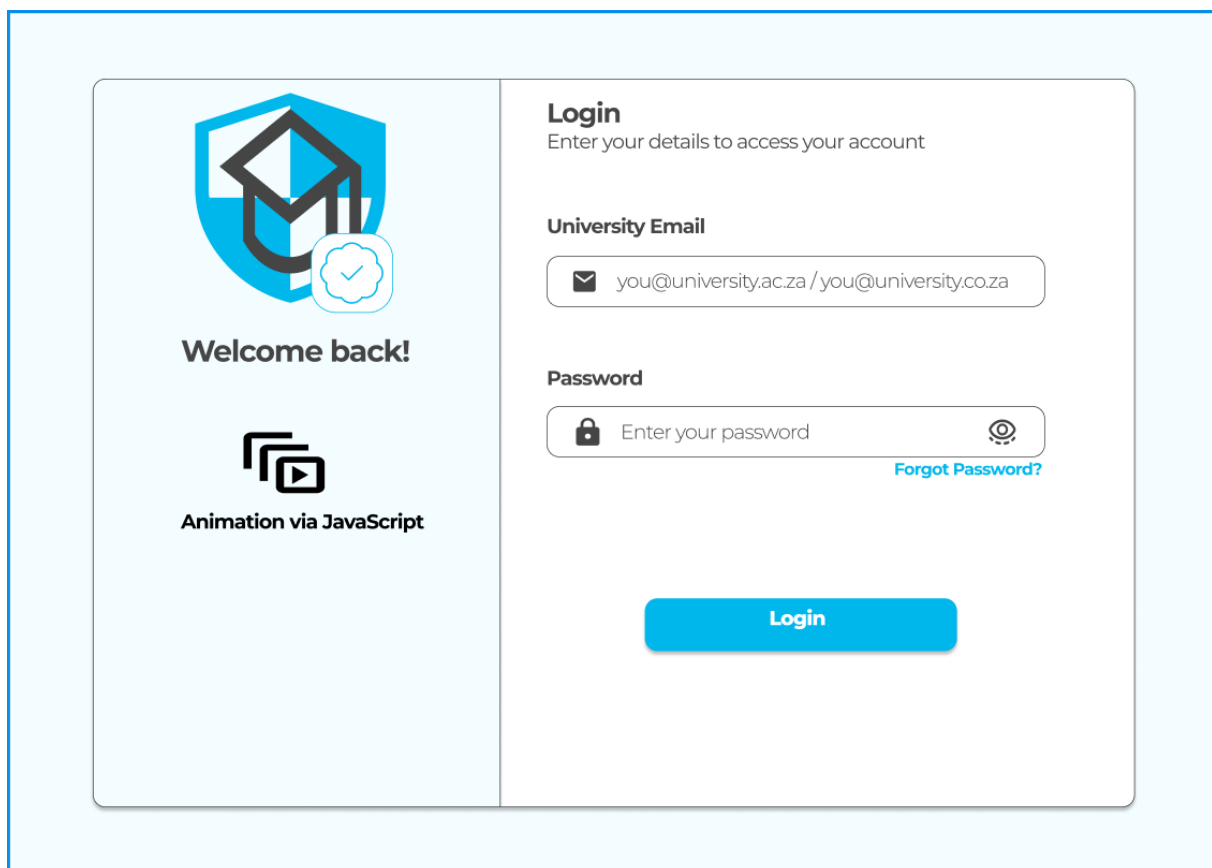

4.1.1 Background Treatment

Both the Login page and the Registration page share the same background: a diagonal gradient at 135 degrees, going from Dark Navy in the top-left to Primary Cyan in the bottom-right. The card sits on top of this gradient, centred both vertically and horizontally.

4.1.2 Card Layout

Both auth cards use a split two-column layout on desktop.

4.1.3 Login Page (Wireframe)

The wireframe shows a login page with a light blue background. On the left, there is a large shield icon with a graduation cap and a checkmark, followed by the text "Welcome back!" and a play button icon with the text "Animation via JavaScript". On the right, there is a "Login" heading, a subtitle "Enter your details to access your account", a "University Email" field with an envelope icon and placeholder text "you@university.ac.za / you@university.co.za", a "Password" field with a lock icon and placeholder text "Enter your password", and a "Forgot Password?" link. A blue "Login" button is at the bottom.

The right panel of the login page has:

1. Heading: "LOGIN" (H2, dark navy, uppercase per H2 style).
2. Subtitle: "Enter your details to access your account" (body, subtle grey).
3. University Email field with envelope icon on the left. Placeholder: `you@university.ac.za / you@university.co.za`.
4. Password field with lock icon on the left and eye toggle button on the right (toggles between hidden and visible password text).

5. “Forgot Password?” right-aligned link below the password field. Colour: #006D8A.
6. Full-width primary Login button.
7. “Don’t have an account? Register” link centred below the button.

4.1.4 Registration Page (Wireframes): 4-Step Flow

The registration form is a 4-step form. A progress indicator sits at the top of the right panel across all four steps.

Step Progress Indicator:

- Four numbered circles connected by horizontal lines.
- Completed steps: filled cyan circle (#00B4D8) with a checkmark icon.
- Active step: white circle with cyan border and cyan number.
- Inactive steps: white circle with grey border and grey number.
- Connector lines: cyan (#00B4D8) for completed, grey (#dddddd) for upcoming.
- Labels below each circle: “Personal Details”, “University Email”, “Verification”, “Password”.

The wireframe illustrates the registration page layout. On the left, a light blue panel contains a graduation cap icon with a checkmark, the text "Join our student community", and a logo with the text "Animation via JavaScript". The right panel, titled "Create an account" with the subtitle "Fill in your details to get started", features a 4-step progress indicator at the top. The steps are: 1 (Personal Details, active), 2 (University Email), 3 (Password), and 4 (Verification). Below the indicator are two input fields: "Full Name(s)" and "Surname", each with a user icon and placeholder text. At the bottom, there are four numbered circles (1-4) and a "Next" button.

Step 1 - Personal Details: Heading “Create an account”. Subtitle “Fill in your details to get started”. Two input fields, Full Name(s) and Surname, each with a user icon on the left. Inputs use a rounded-full pill shape (border-radius: 9999px) on both registration and

login. Step navigation sits at the bottom: step dots on the left, “Next” primary button on the right.

The form is titled "Enter university details" with the subtitle "Fill in your details to get started". It features a progress indicator at the top right with four steps: 1. Personal Details (checked), 2. University Email (active), 3. Password, and 4. Verification. The form is divided into two main sections. The left section contains a blue graduation cap icon with a checkmark, the text "Join our student community", a play button icon, and the text "Animation via JavaScript". The right section contains two input fields: "Name of University/Institution" with a graduation cap icon and placeholder text "Enter the name of the University/Institution", and "University Email" with an envelope icon and placeholder text "you@university.ac.za / you@university.co.za". At the bottom right, there is a "Next" button. At the bottom left, there are four numbered circles: 1 (blue), 2 (blue), 3 (blue), and 4 (blue).

Step 2 - University Email: Heading “Enter university details”. Two fields: Name of University/Institution (with a graduation cap icon) and University Email (with an envelope icon). Email gets checked against the allowlist on submit. Step 1’s circle shows a checkmark once it’s done.

Password

Create your password

Confirm Password

Confirm your password

☐ I agree to the [Terms of Service](#) and [Privacy Policy](#)

1 2 3 4 **REGISTER**

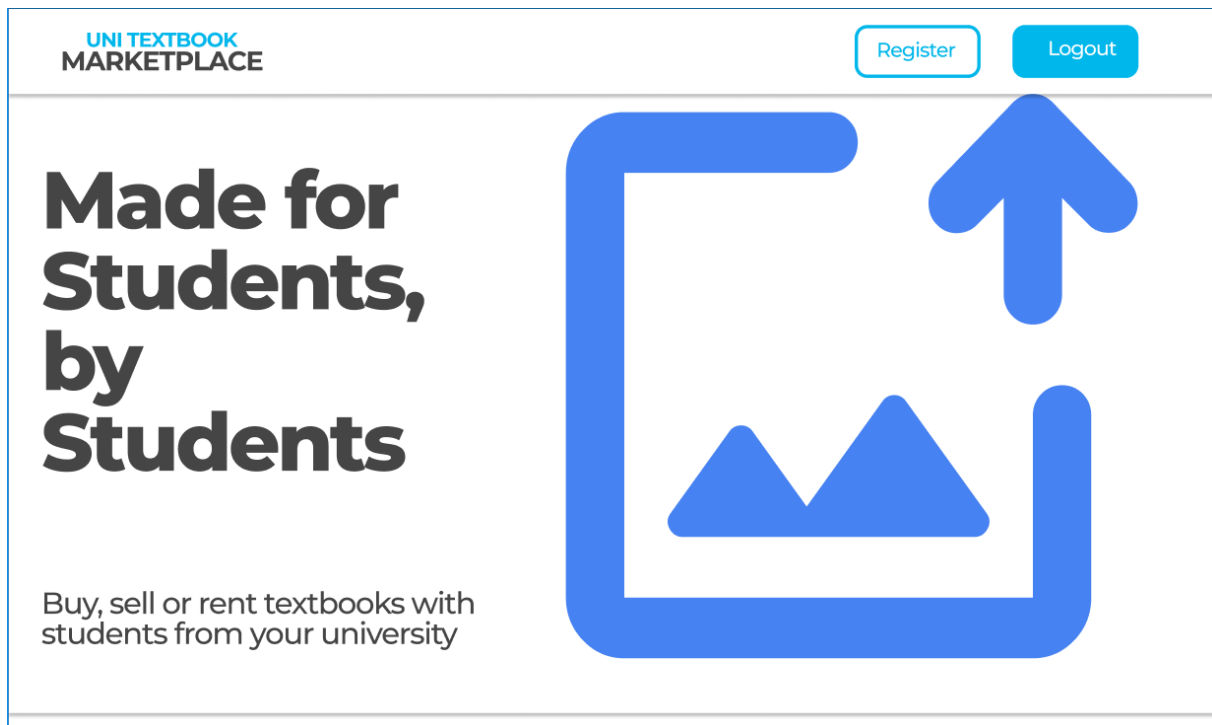

Step 3 - Password: Heading “Password”. Subtitle “Create your password”. Two password fields, Password and Confirm Password, each with a lock icon on the left and an eye toggle on the right. Below that, a checkbox with the label “I agree to the [Terms of Service](#) and [Privacy Policy](#)”. Step navigation: dots on the left, “REGISTER” primary button on the right.

The image shows a design for an OTP Verification screen, divided into two main sections. The left section is light blue and contains a graduation cap icon with a checkmark, the text "Join our student community", a play button icon, and the text "Animation via JavaScript". The right section is white and contains the heading "OTP Verification". Below the heading is a progress bar with four steps: "Personal Details" (checkmark), "University Email" (checkmark), "Verification" (number 3), and "Password" (number 4). Below the progress bar is the instruction "Please enter the OTP(One-Time-Pin) sent to your registered email to complete verification". Below this instruction are six empty square boxes for the OTP code. Below the boxes is a countdown timer "Remaining time: 00:59s" and a "Resend OTP code" link. Below the timer and link is a large blue "Verify" button. At the bottom of the right section are four numbered circles (1, 2, 3, 4) and a blue "Next" button.

Step 4 - OTP Verification: Heading “OTP Verification”. Instructions: “Please enter the OTP (One-Time-Pin) sent to your registered email to complete verification”. Six separate single-digit boxes in a row, the active one has a cyan border. A countdown timer in 00:59s format sits left-aligned below the boxes in cyan. “Resend OTP code” link right-aligned (disabled while the timer’s still running). Full-width “Verify” primary button below the timer row.

4.2 Landing Page (Wireframe)

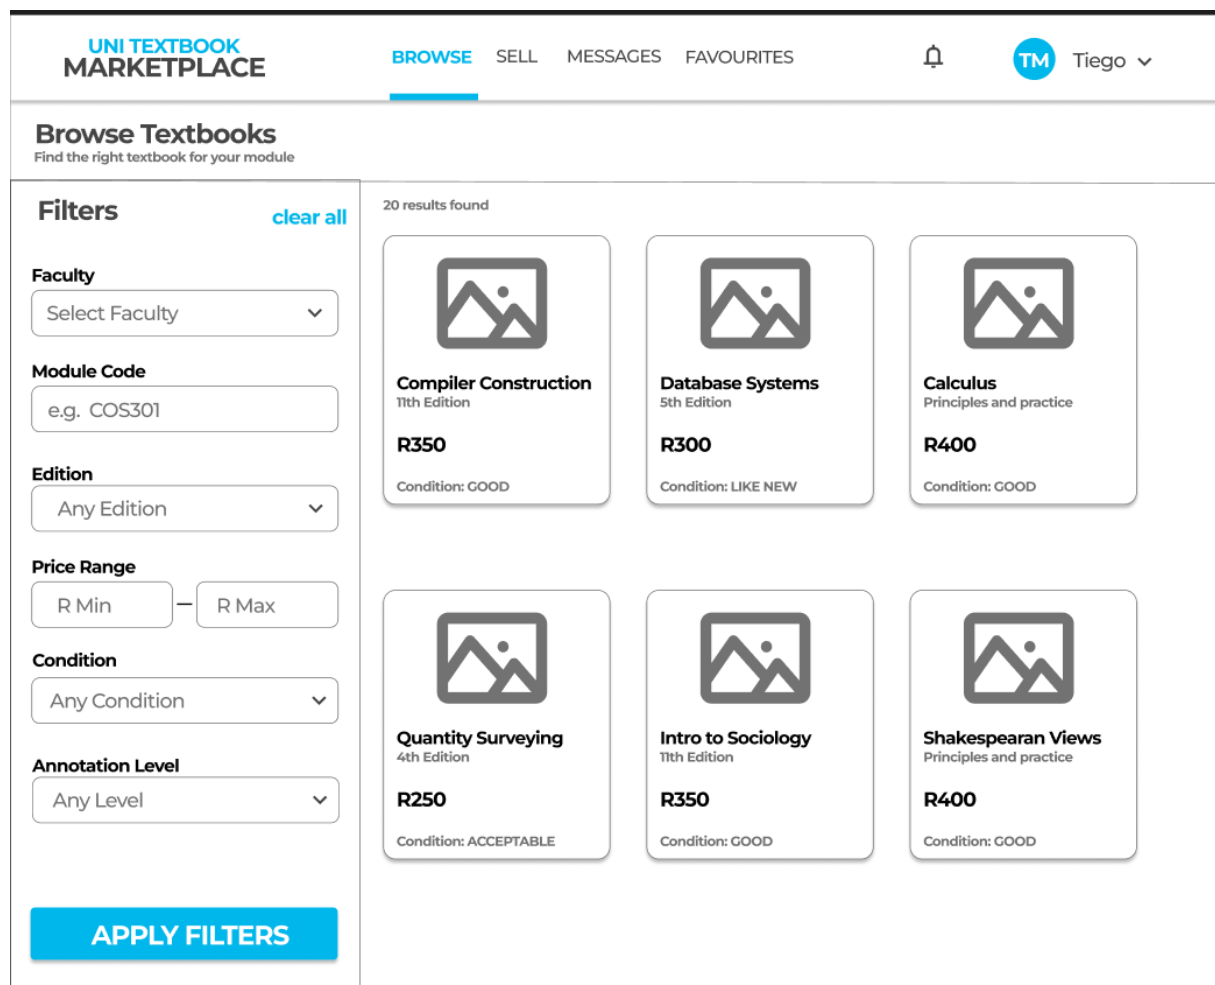

The landing page is where unauthenticated visitors land first. From top to bottom it's made up of:

4.2.1 Hero Section

Two-column layout on desktop. Left column has the headline “Made for Students, by Students” (H1, dark navy), a subtitle “Buy, sell or rent textbooks with students from your university” (body text), and a call-to-action search bar. Right column has a large image placeholder (textbook upload illustration). Background: white.

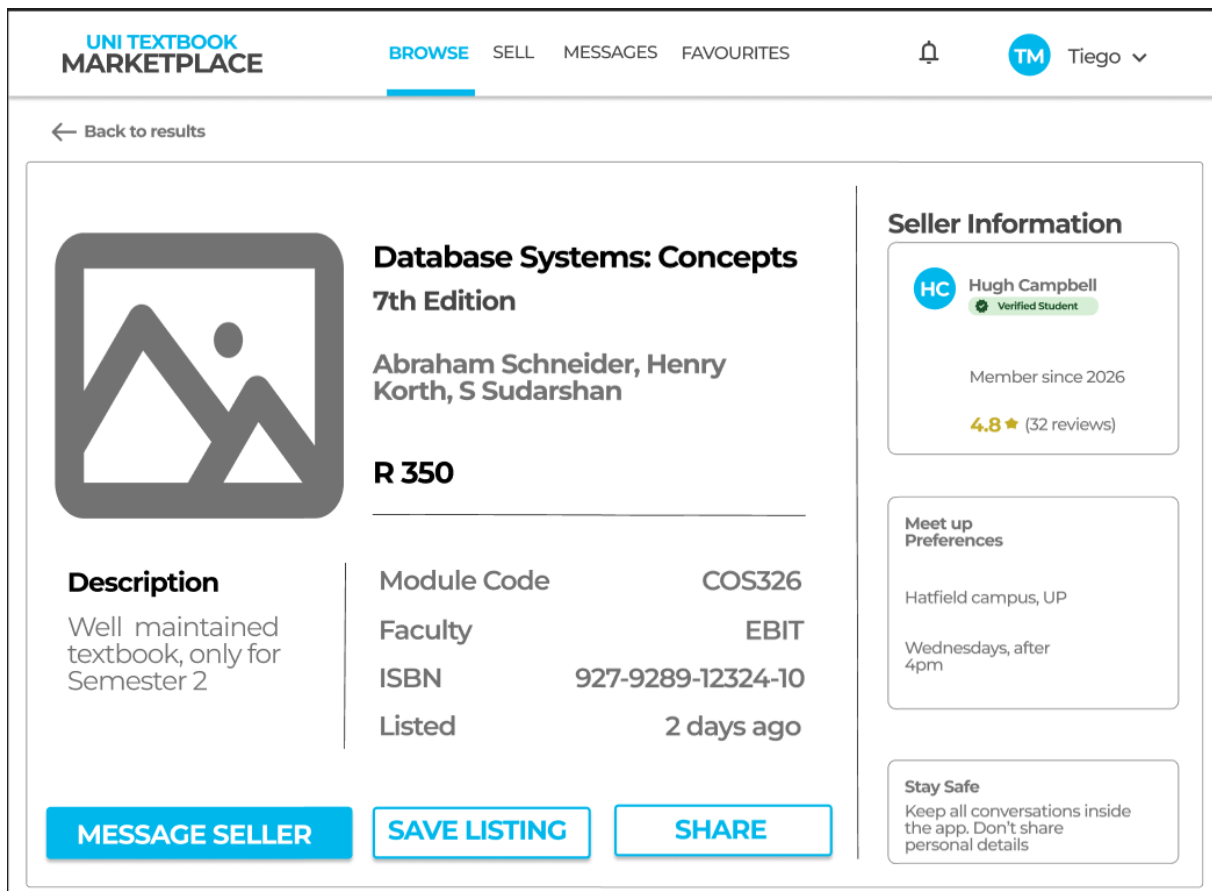

4.3 Listings Browse Page (Wireframe)

The listings browse page is the main page students use once they're logged in, to actually browse what textbooks are available.

- **Filter sidebar (left):** Holds the **Smart filter** controls for module code (search-as-you-type), faculty (dropdown), condition (checkbox group), annotation level (checkbox group), and price range (min/max inputs).
- **Listing grid (right):** A responsive grid of listing cards. 4 columns on large desktop, 2 on tablet, 1 on mobile.
- Each listing card shows: image or placeholder, title, edition, module code, price in Rands, and a condition badge.
- Clicking a card takes you to the listing detail page.

4.4 Listing Detail Page (Wireframe)

The listing detail page shows all the info for one specific listing.

- **Left column:** Photo carousel (or placeholder image). Below the photo: the seller's verified badge and display name.
- **Right column:** Book title (H2), author, module code and name, ISBN, edition, condition badge, annotation level badge, has_notes indicator, price (large, dark navy), and a "Contact Seller" button (primary cyan, disabled and labelled "Coming Soon" for Demo 1).

POST LISTING	

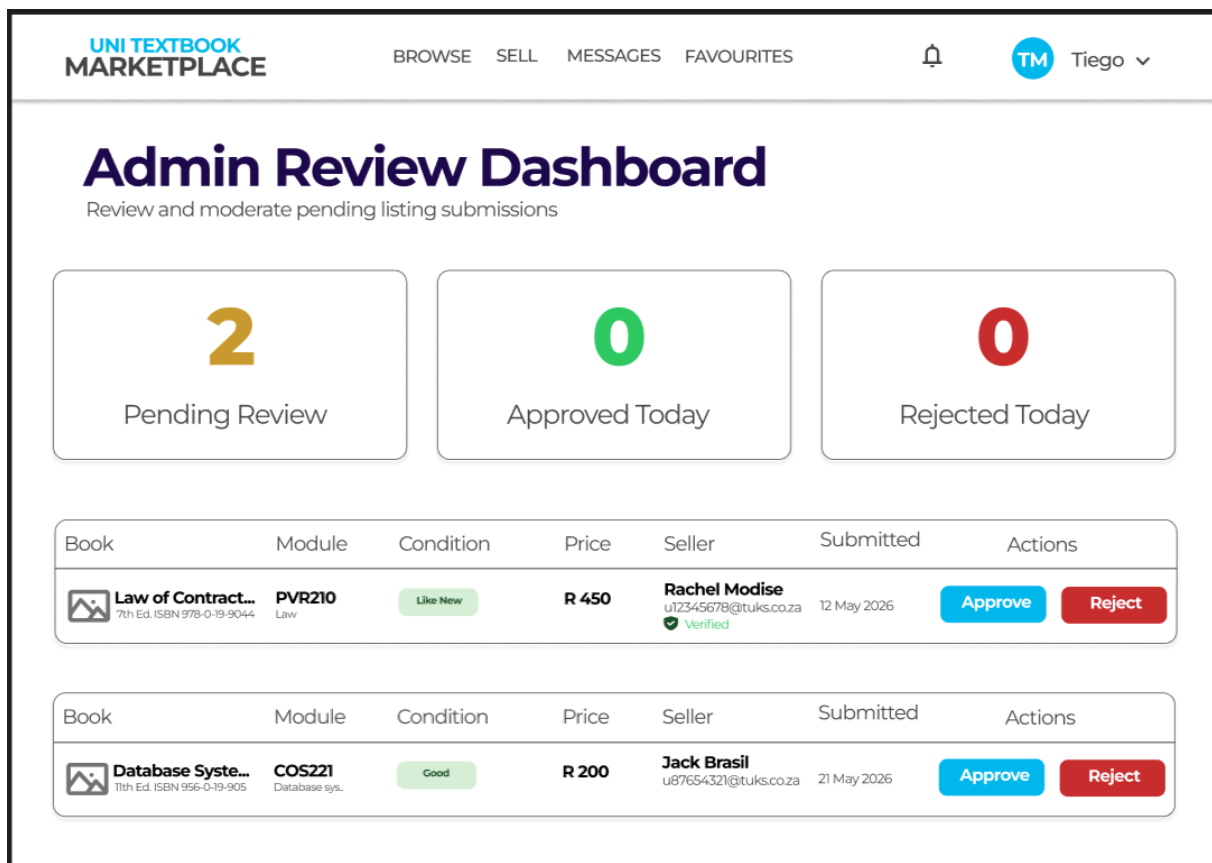

The Create Listing form is a single-page form, with the following fields in order:

1. **ISBN** - text input, optional.
2. **Title** - text input, required.
3. **Author** - text input, optional.
4. **Edition** - number input, required.
5. **Condition** - select dropdown with options: New, Good, Fair, Poor. Required.
6. **Annotation Level** - select dropdown with options: None, Light, Heavy. Required.
7. **Module Code** - search-as-you-type input. Typing a partial code shows a dropdown of matching modules from the database. Required.
8. **Price (R)** - number input, minimum 0.01. Required.
9. **Includes Study Notes** - checkbox toggle. Default: unchecked.
10. **Photos** - multi-file upload input. Optional.

11. **Submit** - full-width primary cyan button labelled “Submit Listing”.

Once submitted successfully, a success banner shows up: “Your listing has been submitted and is awaiting admin review.” The listing shows up on the student’s My Listings page right away with a PENDING badge.

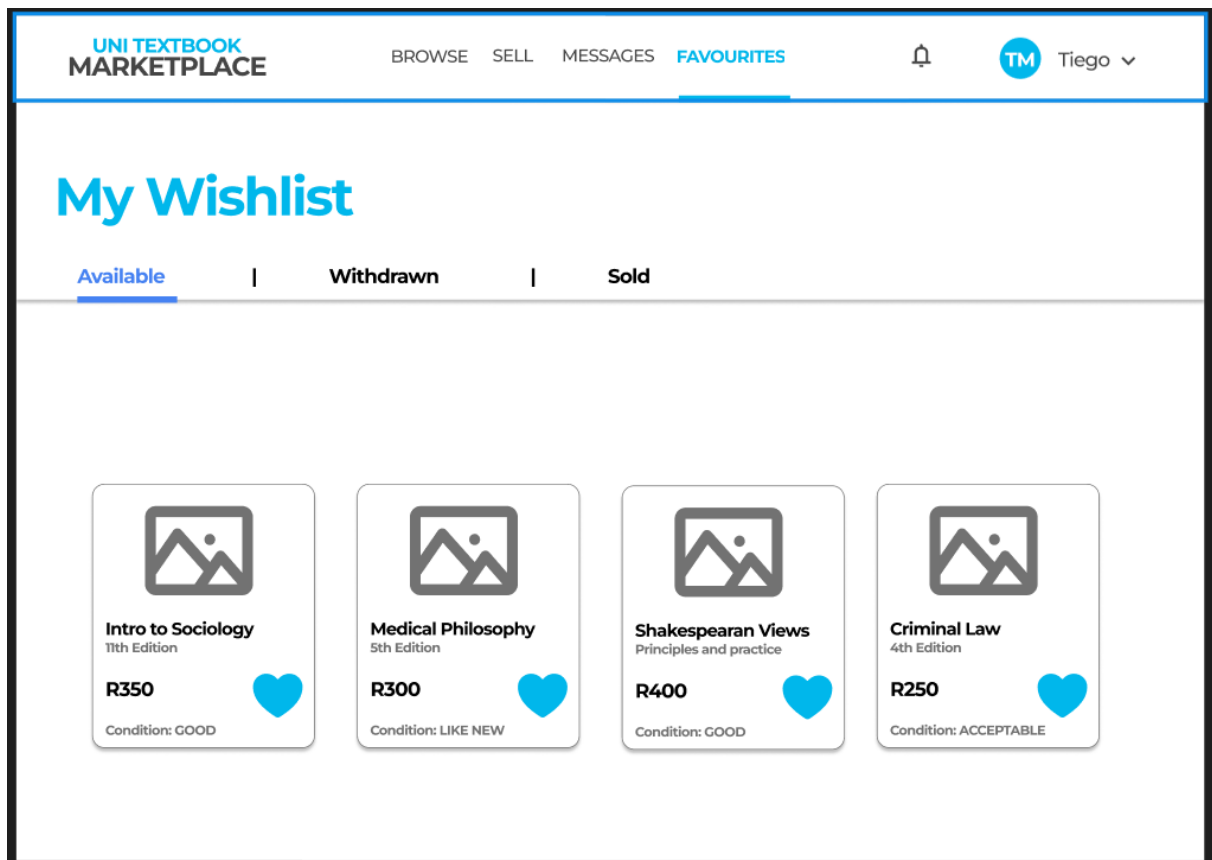

4.6 Admin Review Dashboard(Wireframe)

The Admin Review Dashboard is only accessible to admin users. It’s the main moderation screen.

- Page heading: “Pending Listings” (H1).
- A summary counter showing how many pending listings there are.
- A table listing all PENDING submissions. Columns: Title, Seller Name, Module Code, Edition, Condition, Price, Submitted Date.
- Each row has two action buttons:
 - **Approve** : primary cyan button. On click: calls PATCH /admin/listings/:id/approve.
 - **Reject** : danger red button. On click: opens a confirmation modal with an optional rejection reason text field.
- Once approved or rejected, listings disappear from the table right away, with a success toast notification.

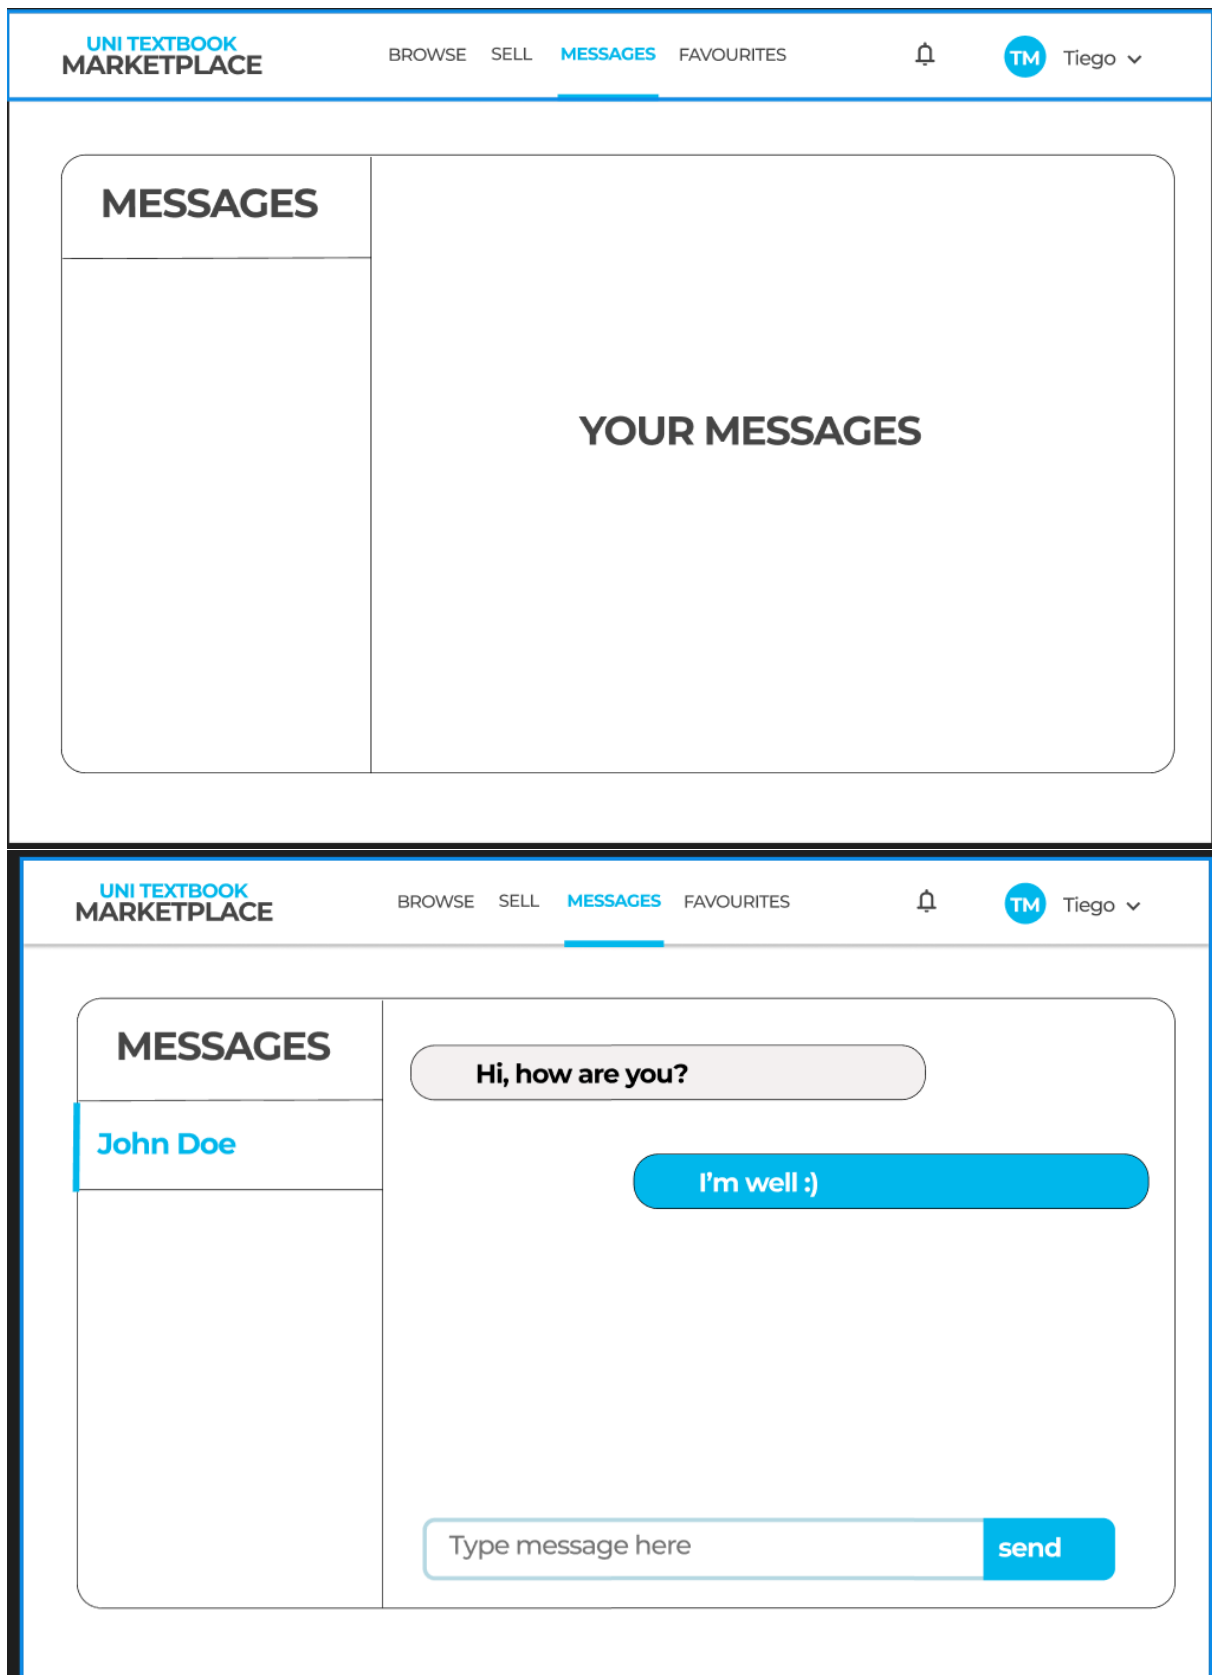

4.7 Wishlist Page (Wireframe)

The Wishlist page shows every listing a logged-in student has saved for later.

- Page heading: “My Wishlist” (H1).
- **Listing grid:** Same responsive card grid as the Listings Browse page (4 columns desktop, 2 tablet, 1 mobile). Each card shows image or placeholder, title, edition, module code, price in Rands, and a condition badge.
- **Wishlist icon:** A bookmark icon shows up on every listing card across the platform (browse grid, listing detail page). Outline state means not saved. Filled cyan (#00B4D8) means saved. Clicking it toggles the wishlist entry via POST/DELETE /wishlist without leaving the current page.
- **Empty state:** If the student hasn’t saved anything, the page shows a centred message “You haven’t saved any listings yet” with a “Browse Listings” button linking back to the browse page.
- Removing a listing from the Wishlist page (through the filled bookmark icon) removes the card from the grid right away, no confirmation step needed.

4.8 In-App Messaging (Wireframe)

In-app messaging lets a verified student contact a listing's seller directly, right on the platform. It replaces the "Contact Seller – Coming Soon" disabled button that was on the

Listing Detail page in earlier demos.

- **Entry point:** On the Listing Detail page, the “Message Seller” button (primary cyan) is now enabled. Clicking it opens the conversation for that listing, creating a new one if one doesn’t already exist.
- **Layout:** Two-column layout on desktop.
 - **Left column – conversation list:** Each row shows the other participant’s display name, a thumbnail of the listing the conversation is about, a preview of the last message, and a relative timestamp (e.g. “2h ago”). The active conversation gets a light cyan background.
 - **Right column – active conversation thread:** Message bubbles are right-aligned in primary cyan for your own messages, and left-aligned in light grey for the other person’s messages. A listing summary card (title, price, thumbnail) stays pinned at the top of the thread as a reminder of what’s actually being discussed.
- **Message input:** A text input pinned to the bottom of the thread, with a full-width text field and a “Send” button (primary cyan, disabled while the field’s empty).
- **Real-time updates:** New messages show up in the thread right away through a Firestore real-time listener, no page refresh or manual polling needed.
- **Mobile layout:** On mobile, the conversation list and the active thread are separate full-screen views. Opening a conversation takes you to the thread view, with a back arrow to get back to the list.

4.9 Audit Log Page (Wireframe)

Audit Logs

Review and moderate pending listing submissions

ActionStart DateEnd DatePerformed by

Total logsClear Filters

Date	Action	Entity	Performed by	Notes	Reason
2 July 2026	Approve listing	listing	Tiego Mokwena u12345678@tuks.co.za	Physics Textbook	Meets Requirements

The Audit Log page is only accessible to admins, and can be reached from a link on the Admin Review Dashboard.

- **Page heading:** “Audit Log” (H1).
- **View toggle:** Two tabs at the top of the page, “Full Log” and “Summary Statistics”.
- **Full Log tab:** A table of every moderation action taken. Columns: Entity Type, Entity ID, Action (APPROVED / REJECTED badge), Performed By, Performed At, Notes.
- **Summary Statistics tab:** Aggregate counters (e.g. total approvals vs. total rejections) shown as summary cards, so admins can get a quick overview without having to scroll through the whole table.
- **Entity lookup:** A search field lets an admin type in a specific entity type and ID (e.g. a listing) to filter the table down to just that entity’s full history.
- Rows are read-only, the audit log itself can’t be edited or deleted from the UI, since it’s meant to be an immutable accountability trail.

To view the wireframes on **Figma** check out [our here](#).

4.10 Report and Ban Management (Wireframe)

No wireframe render exists for this flow; the actual system screenshots are included instead under Section 4 (Screenshots of the Actual System).

This is new for Demo 3 (UC10). It covers four connected screens: a student reporting a listing, an admin reviewing and actioning that report, the screen a banned student sees in place of the normal app, and an admin reviewing an appeal.

4.10.1 Report a Listing

- **Entry point:** On the Listing Detail page, a “Report Listing” text link with a small flag icon sits below the primary “Message Seller” button. It’s deliberately understated (subtle grey text, not a filled button) since it’s a secondary, safety-net action rather than something the page wants to draw attention to.
- **Report form:** Clicking it opens a modal: heading “Report this listing”, a required reason textarea, a secondary/outline “Cancel” button, and a danger-red “Submit Report” button.
- **Confirmation:** On submit, a toast confirms: “Thanks – we’ve received your report and will review it.” The modal closes and no further UI change happens on the reporting student’s side.

4.10.2 Admin Report Review Dashboard

- Reachable from the Admin Review Dashboard via a second tab alongside “Pending Listings”, labelled “Reports”.

- A table of PENDING reports. Columns: Listing Title, Reported By, Reason, Reported Date, Status (PENDING / REVIEWED badge, reusing the Pending badge colours from Section 2.2).
- Each row has two actions:
 - **Dismiss** – secondary/outline button. Sets the report to REVIEWED with no further action, and the row disappears from the Pending filter with a success toast.
 - **Ban Seller** – danger-red button. Opens a confirmation modal requiring a ban reason before the ban is applied, since this is a destructive, high-consequence action that shouldn't be a single accidental click.
- Once actioned, the row disappears from the table right away, matching the same pattern as the existing Admin Review Dashboard.

4.10.3 Banned Account Screen

- If a banned student's login or token-refresh attempt returns 403, they see this full-screen state instead of the normal app shell: heading "Your account has been suspended" (H1, dark navy), the ban reason if one was given, and an appeal form (a required textarea plus a primary-cyan "Submit Appeal" button).
- Once an appeal is submitted, the same screen switches to a read-only "Appeal submitted, pending review" state instead of the form, so a banned user can't submit multiple appeals for the same ban while one is already pending.

4.10.4 Admin Case Review Dashboard

- Reachable from the same area as Report Review, as a third tab labelled "Appeals".
- A table of PENDING appeal cases. Columns: Banned User, Ban Reason, Appeal Message, Submitted Date, Status (PENDING / UPHELD / REVERSED badge – UPHELD reuses the Rejected badge colours, REVERSED reuses the Approved badge colours, since the underlying outcome is the same shape as an approve/reject decision).
- Each row has two actions: **Uphold Ban** (danger-red outline button, ban remains in place) and **Reinstate Account** (primary-cyan button, account is restored).
- Either decision fires a notification to the user (UC9) and shows a success toast on the admin side, and the row disappears from the Pending filter.

4.11 General UI Improvements

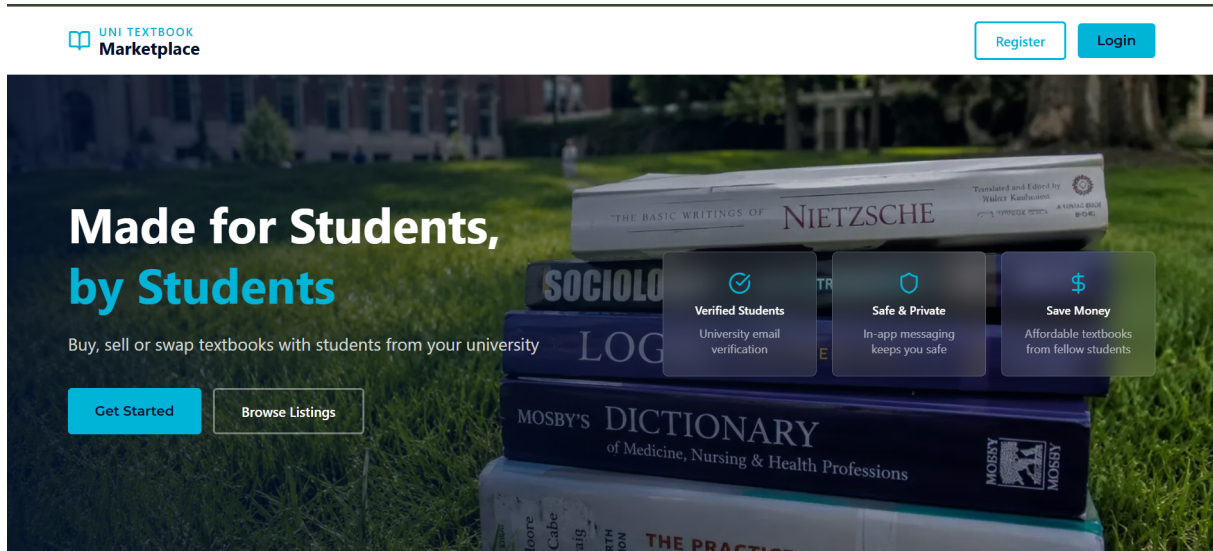

Alongside UC9, UC9.1, UC9.2, UC10, and UC5.2, the following consistency and polish changes were made across the platform:

- **Small page headers:** every page now has a small, consistent header at the top of its content area (page title plus a brief context line), rather than each page inventing its own heading treatment. This follows the existing type scale from Section 2.2 and is applied uniformly across pages built at different points in the project.

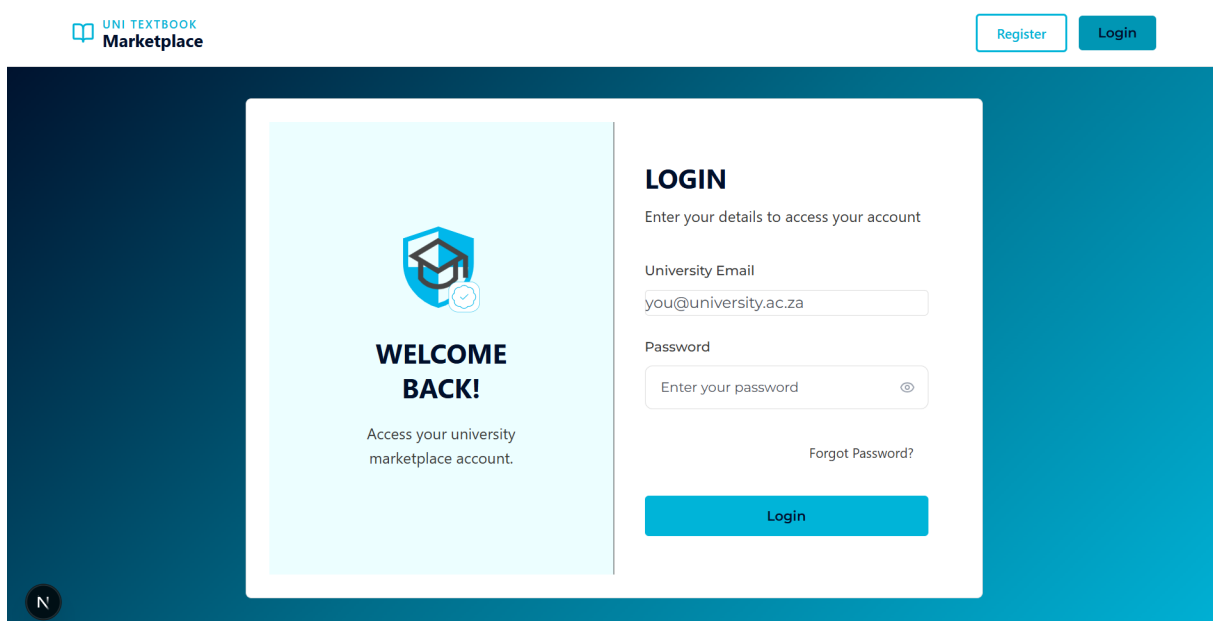

- **Colour-coded condition badges:** the condition badge (New / Good / Fair / Poor) shown on listing cards and the listing detail page now reuses the platform's existing badge colour tokens instead of a single neutral grey badge for every condition – New and Good reuse the Approved badge palette (green-toned), Fair reuses the Pending badge palette (blue-toned), and Poor reuses the Rejected badge palette (red-toned). This lets a buyer gauge a listing's condition at a glance while scanning a grid, without reading each card individually.
- **Messaging UI improvements:** refined message bubble spacing, timestamp placement, and the pinned listing summary card at the top of a conversation thread, for a cleaner, less cramped reading experience.
- **General consistency pass:** spacing, button sizing, and hover/focus states brought in line with each other across older and newer pages, so pages introduced in Sprint 5 match the visual rhythm of pages built earlier in the project instead of feeling like a different app.

DATABASE SYSTEMS TEXTBOOK

R 460.00

Description

The book is in an okay condition. It has a few notes, but these helped me for COS 221. This book introduces the fundamental concepts necessary for designing, using, and implementing database systems and database applications. This is a very handy book.

6. Accessibility

6.1 WCAG AA Compliance

We're aiming for WCAG 2.1 Level AA compliance across the platform. The following rules get enforced across all UI components.

- **Colour contrast:** We checked every foreground/background colour pair to make sure they hit the 4.5:1 minimum contrast ratio for normal text and 3:1 for large text (18px bold or 24px regular). The full contrast check is documented in Section 2.2 (badge colours) and in `globals.css`.
- **Link text on white:** We use Link Cyan (`#006D8A`) instead of Primary Cyan (`#00B4D8`) for inline text links on white backgrounds, since Primary Cyan on white fails the 4.5:1 ratio. Link Cyan on white gets 5.1:1.
- **Form label association:** Every form input has a matching `<label>` element with a corresponding `htmlFor` and `id` pair. SonarCloud checks this on every pull request.
- **Focus indicators:** Every interactive element has a visible focus ring. Inputs use a 3px cyan focus ring (`rgba(0, 180, 216, 0.15)`). Buttons use the default browser outline plus hover state changes.
- **Minimum tap target size:** Every interactive element on mobile is at least 44 x 44px.
- **Keyboard navigation:** Every interactive element can be reached with keyboard Tab navigation, in a sensible order.
- **ARIA labels:** Icon-only buttons (eye toggle, hamburger menu) have an `aria-label` describing what they do.

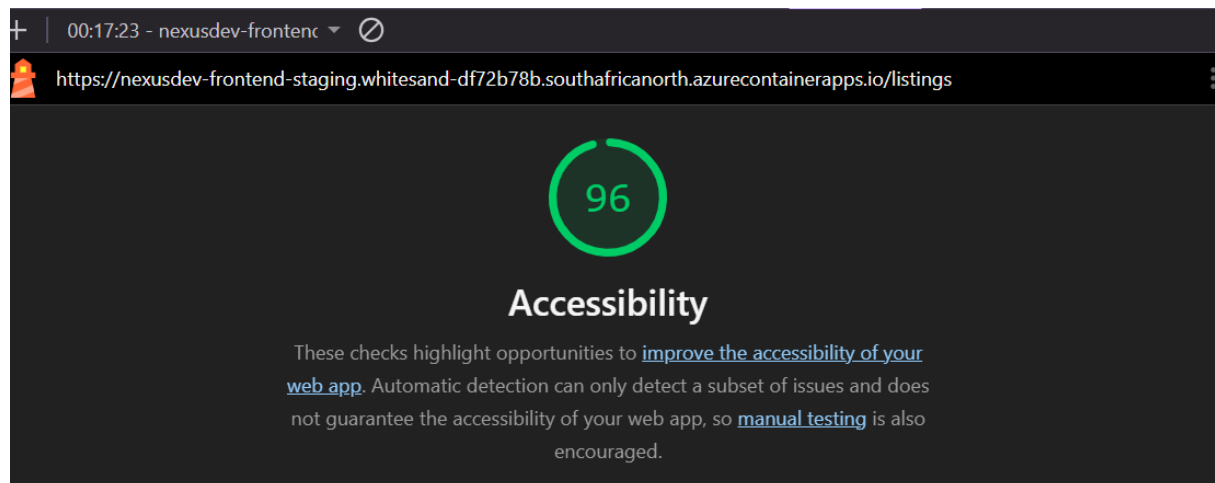

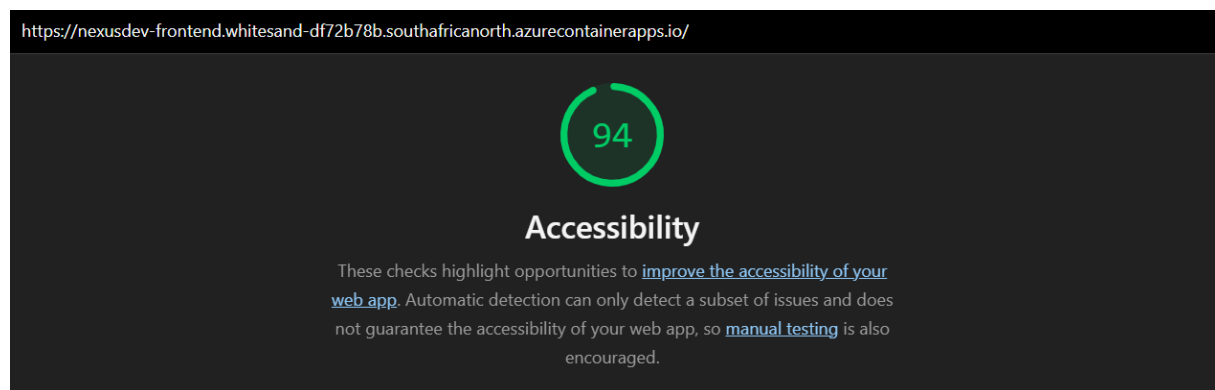

6.2 SonarCloud Enforcement

Accessibility issues are treated as blocking in the SonarCloud Quality Gate we've got set up on the GitHub repo. Every pull request has to pass the Quality Gate before it can merge into `develop`. Some of the rules it checks: form labels need to be tied to their controls, links need accessible names, and colour contrast needs to meet WCAG AA.

6.3 Lighthouse Audit Results

On top of the WCAG AA rules we enforce while building, we also periodically run the platform through Google Lighthouse to see how it actually scores on accessibility once it's rendered.

Page	Lighthouse Accessibility Score
Landing Page	94 / 100
Listings Browse Page	96 / 100
Create Listing Page	94 / 100
In-App Messaging	95 / 100
My Listings Page	96
Wishlist Page	96 / 100
Notifications Page	94 / 100
Saved Searches Page	96 / 100
HelpMenu Page	96 / 100
Admin Review Dashboard	95 / 100
Audit Log Page	85 / 100

The Audit Log Page currently scores the lowest out of everything we audited, mostly because of how dense the tabular data is, plus the summary statistics view adding more contrast and labelling checks on top. The Listings Browse Page scores a bit lower than the rest too, which comes down to how many interactive elements are packed into the filter sidebar and listing grid (more inputs and links for Lighthouse to check contrast and labelling on). We're tracking both of these as follow-up items, see the Known Follow-ups section of the SAS document.
